Thank you for purchasing intelligent vacuum cleaner.
Wish you have a happy experience!

1. Safety Instruction

1.1 Use Notes

Before using the product, please observe the following safety precautions:

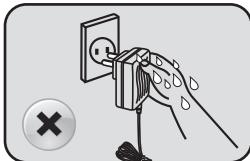

- * Read the instruction carefully; use the product according to the operation procedures.
- * Keep the instruction carefully, and look it up in the future.
- * If you want to give the product to others, please enclose the instruction.
- * Wrong operation will lead to serious personal injury and damage the product.

1.2 Safety Precautions

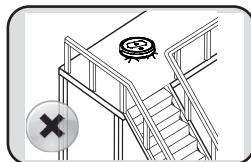

Caution

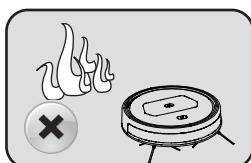

-  Only use the original adaptor, battery and charging station, or else it will damage the machine and cause fire because of electric shock and high voltage.
-  If you find that the main body and accessories are damaged, Please do not use the cleaner and keep contact with the after-service department. Anyone is not allowed to disassemble, maintenance or remould the machine.

-  Pull off the plug before doing the maintenance.
-  Do not touch the battery socket and the machine when your hands are wet, or else it will cause electric shock.
-  If the mains cord is destroyed, to avoid danger, please contact us and wait for professional persons to replace it.

⚠ Don't use this product without magnetic boundary strip or obstacles crossing stairs to prevent the vacuum cleaner from falling accidentally and causing personal injury.

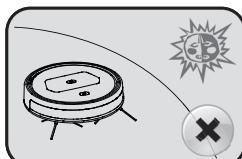

⚠ Do not put the machine behind the fire, inflammable, explosive and corrosive materials.

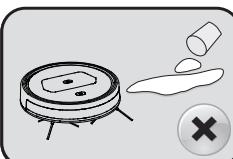

⚠ Do not put your clothes or any place of your body(hair, finger and so on) into the main brush and wheels, or it will cause personal injury.

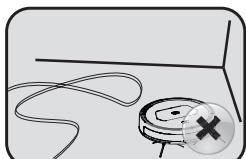

Attention

The machine is only used indoor.

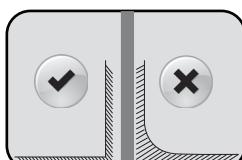

Prevent water, oil and other liquid into the machine.

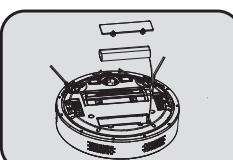

Clean up the wires and sundries on the ground in case of being tangled into wheels and brushes.

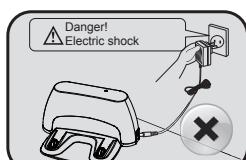

Please remove all fragile objects.

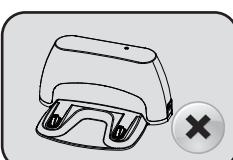

Charging station should be against the wall and flat place, or else the function will be influenced.

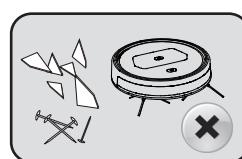

Switch off the cleaner when taking out the battery.

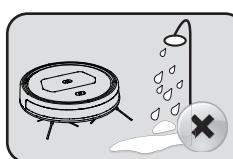

Please cut off the battery socket, not used for a long time.

If the docking station is removed when works, it will cause incapability of the machine to recharge.

Please don't collect something sharp with the device, such as glass sheet, iron nail and others, for fear of the damage to the product.

Please don't use this cleaner in humid or flammable, explosive and corrosive environments.

1.3 Child Safety

- * The machine should not be used alone by children.
- * Forbid the children to play the poly bag, or else it will cause smother.

1.4 About Battery

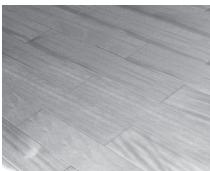

1. The machine will only be used with the original battery.
2. Please turn off the power switch before taking out the battery.
3. The battery must be taken out before abandoning it.
4. If you want to replace the battery, please keep contact with our after service department. It will lead to accident if wrong battery is put in the machine.
5. If the battery is leaked, please do not touch the liquid, wipe the liquid with dry cloth, and put the battery to recycle bin or maintenance point, do not throw it at random.
6. Please handle the old battery of the parts (remmote control). The battery includes hazardous substance, please put it to recycle site according to original environmental protection regulations.

1.5 Usable Range

Applicable Range

The cleaner is suitable to the following environment:

Wooden Floor

Tile

Carpet

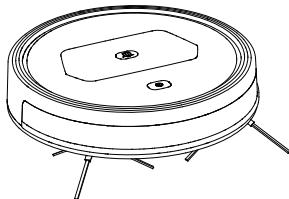

1.6 Exception Clause

One of the following circumstances of the product is not in the range of free service. Repair under payment can be carried out:

- A. The damage to the product arises out of the user's operation and storage against our Manual;
- B. The whole machine and its components have been out of the free warranty period;
- C. The damage to the product arises out of the disassembly by the serviceman not sent or authorized by our company;
- D. The valid purchase invoice can't be provided;
- E. The model in the warranty card is inconsistent with that of the product for repair or is altered;
- F. The damage to the product arises out of the irresistible factors such as natural disasters;
- G. The failure or damage to the product arises out of accidental or human factors (including disoperation, liquid feeding, improper insertion and pulling, scratch, handling, bumping, inappropriate voltage input, etc).

3. Product Installation

3.1 Installation and Removal of Main Body Battery

1. Loosen the screws on the battery cover with a screwdriver and open the cover.
2. Wiring Method: Take out the connectors of the battery and the cleaner first, and then join them according to the corresponding color direction.
Unwiring Method: Unplug the terminal of battery line in the reverse direction.
3. Put the battery into the compartment as per the direction shown in the figure first, and then place the well-arranged terminals and wires into the space. Finally put the cover on and lock it with screws.

3.2 Installation of Charging Station

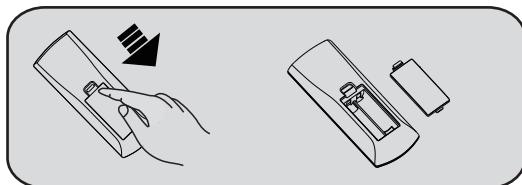

1. Place the charging base on the flat ground that is perpendicular to the wall. There is no obstacle within the range of 3 meters in length and 1 meter in width. Press the charging base with force to make it more firmly pasted on the floor. After plugging in the adapter, insert the DC plug into the DC port.
2. Connect the Adapter to the Docking Station and the power supply. Sort out the connecting cable of the adapter carefully to make the cleaner wound when it works.

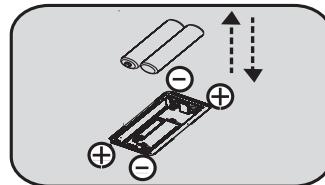

Tips:

The docking station can't be placed on the carpet. It is recommended to place it at a fixed position for a long time. Please don't move the docking station artificially during the cleaning.

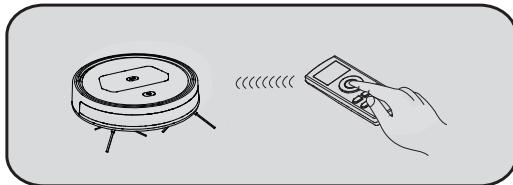

3.2 Installation of Remote Control

1. Open the battery cover.

2. Place two AAA (#7) batteries into the compartment.

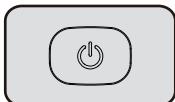

3. After installing the battery, turn on the power switch of the cleaner. Check whether the remote control can control the cleaner. In case of no reaction, refer to Recoding the Remote Control Code on Page 12.

4. Product Usage

4.1 Main Body's Usage

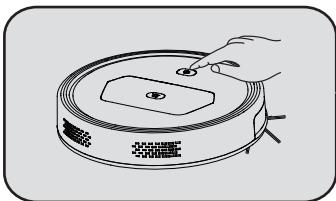

4.1.1 Introduction to Control Button

Button Introduction	
	Power Button
	Dust box Button

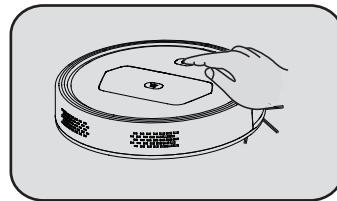

4.1.2 Work Mode:

4.1.2.1 Manual Mode

Specification	Φ326*82mm		

⚠ Remarks: our company reserve the right due to the need fo rany technology, product design changes on products improvement. The power of interpretation is owned by our company.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: The Grantee is not responsible for any changes or modifications not expressly approved by the party responsible for compliance. Such modifications could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. To maintain compliance with FCC's RF exposure guidelines, this equipment should be installed and operated with a minimum distance of 20cm between the radiator and your body.
